EXPERTISE.
DISCRETION.
RESULTS.

Spanning from the Americas to Asia, SOC has assisted in 22 countries worldwide — with over a decade of successful performance.

A DAY & ZIMMERMANN COMPANY

Integrated Security Solutions

We bring a full suite of integrated programs to support our customers' evolving security and protective force needs. From securing vital national security assets in the United States and abroad, to personal protection for high ranking U.S. Government officials overseas, SOC designs and delivers discrete and proactive solutions to detect and deter the full spectrum of threats.

Installation Security: SOC has provided installation security through the design, construction and management of life support compounds for the U.S. Department of Defense, Department of State, Department of Energy and commercial clients throughout the United States, Middle East, and Africa since 2004.

Mobile Security: SOC brings a proven mobile security methodology based on internal best practices derived from our work with Government clients, law-enforcement and special operations communities. As an operator on the ground supporting intelligence-driven operations, we provide threat assessments and actionable intelligence to forward deployed teams and client managers.

Technical Security: SOC develops and employs innovative surveillance, security and intelligence systems to complement and enhance client operations. Our proficiencies include the design, acquisition, and maintenance of security systems and infrastructure.

Working Dog Solutions: We lead one of the single largest specialized canine programs in existence – with services throughout the United States, Middle East and Africa. SOC's canine teams have extensive detection experience which includes the protection of embassies, camps and installations abroad –crucial to the protection of national security here in the U.S. and abroad.

Workforce & Staffing Solutions

Our Workforce & Staffing Solutions Group partners with prime government contractors and subcontractors to support the Federal Government, specifically with the staffing needs of bringing cleared talent to these organizations. As provider of workforce and staffing solutions, we support a variety of clients, with a scalable approach for both global and domestic companies, large and small. With global reach and staffing experience in more than 37 states, we support operations around the world with technical staffing solutions through direct contract awards and teaming arrangements in support of the U.S. national security mission. Our team is dedicated to delivering cleared resources in support of the Department of Defense, the Intelligence Community and Federal Civilian Agency Programs.

AT A GLANCE

Critical Infrastructure Solutions

SOC brings more than a century of successful critical infrastructure solutions experience to our customers here at home and around the world. With robust capabilities in Facility Management and Operations (M&O), Architecture, Engineering and Construction (AEC), Life Support and International Logistics Services, we custom design our solutions to address each project's unique needs, including those in austere high-risk and secure environments.

Facility Management & Operations (M&O): SOC provides a range of facility Management & Operations (M&O) services to various Federal agencies, as well as commercial clientele such as Foreign Military Sales (FMS) contractors operating around the world. Our services include facility maintenance and modification, engineering and construction, as well as the operation and maintenance of roads, railways, and housing systems.

Explosive Ordnance Storage and Disposal: SOC manages a wide portfolio of munitions storage and disposal, including large items (explosive devices and mines), medium caliber munitions, and small arms and fuses. For more than thirty years we have operated with a strong safety record, using only environmentally responsible disposal processes

Architecture & Engineering: Our company portfolio brings more than 100 years of proven experience delivering comprehensive architecture and engineering (A&E) services in support of defense and other federal programs. SOC offers an extensive range of engineering and design services, from concept through commissioning of greenfield facilities, retrofits, and upgrades.

International Logistics: With a robust logistical model and supply lines and infrastructure that spans over 20 countries, SOC's capabilities deliver supply chain management, contingency operations, air transportation, fleet transportation, vehicle maintenance, and procurement. Our logistics and management solutions are cost-conscious, flexible, and innovative.
